HAUTONGA
Integrated Amplifier

A perfectly equipped and well balanced piece, the Hautonga further builds on the ground-breaking development of preceding Plinius integrated amplifiers.

Careful attention has been paid to signals and circuit layout with shorter signal paths, optimal component placement and a new wiring specification working in harmony to extract exciting new depth and detail from any musical recording.

The rear panel is outfitted with five line level RCA inputs with Phono RCA and a balanced XLR pair additional as standard. Pre Out remains as does the Line Out connection for archiving or other ancillary equipment. The addition of trigger in and out connectors provide for multi-room or home theatre simplicity.

Scroll through inputs or access HT Bypass using the full function remote. Mute and volume controls are standard, as is the display brightness adjustment and the full complement of CD player functions. A standby mode for true low power operation conserves energy while keeping the circuit active to deliver peak performance with minimal delay.

Taking integrated refinement to a new level, the Hautonga is an amplifier determined to realise the peak of its potential.
